

The Rinnai Control-R[™] Wireless Module and App for Rinnai Tankless Water Heaters

SMART JUST GOT EVEN SMARTER

Rinnai creates innovative solutions that enhance the way people live. And with the introduction of the Rinnai Control-R[™] Wireless Module and mobile app for Rinnai Tankless Water Heaters, we're taking control and flexibility to a new level.

With Wi-Fi connectivity, new and existing Rinnai Residential and Commercial Tankless Water Heaters (2006 and newer) can be remotely monitored and controlled via smart devices. The Rinnai Control-R[™] has the capability to provide a new option for management, control and maintenance of Rinnai Tankless Water Heaters.

And now Rinnai Tankless Water Heaters that feature Circ-Logic or ThermaCirc360 are Alexa-enabled, you can just ask to start recirculation allowing recirculation to begin with a simple voice command.

Key Benefits

Control and Convenience: Control your Rinnai Tankless Water Heater from a smart phone or tablet.

- Adjust temperature
- Register product via QR code or serial number
- Activate recirculation (if you have a recirculation system)

Remote Diagnostics and Monitoring Alerts: Remote diagnostic tools provide detailed system information.

- Select a monitoring dealer
- Receive automatic maintenance alerts
- Enable monitoring dealer to manage system performance and provide faster service

Faster Hot Water: With the addition of wireless demand recirculation accessories, hot water can be obtained at the push of a button.

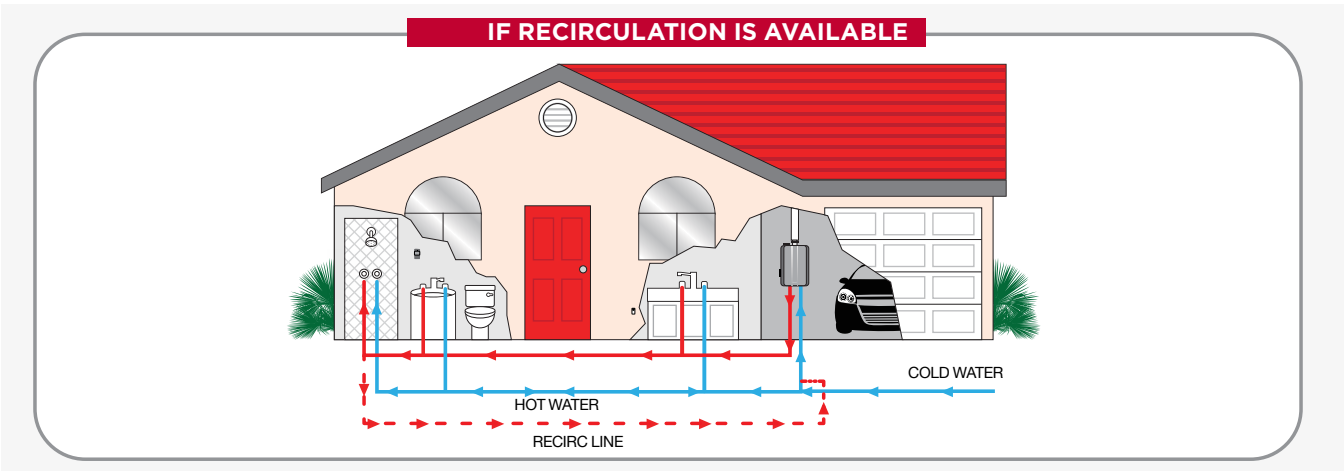

The Control-R™ Module attaches easily to the Rinnai Tankless Water Heater by a two-wire interface quickly connecting through the local Wi-Fi network for monitoring. Once connected and the free Rinnai mobile app is downloaded, the Rinnai Tankless Water Heater can be associated to you, by the owner, for monitoring and servicing.

FOR MODELS with RECIRCULATION CAPABILITY

Rinnai has designed the Rinnai Control-R™ Module to pair directly with the push button and motion sensor demand recirculation accessories to provide faster hot water.

Key Benefits

- On demand hot water – only when you want it - where you want it... at the push of a button
- Title 24 Compliant - meets California Energy Commission’s Title 24 requirements
 - Wireless Control – no need to run wires to each fixture and faucet

Recirculation Components

- Control-R™ Module - attaches easily to the Rinnai Tankless Water Heater by a two-wire interface
- Wireless Push Button - mounted near the point of use, like a kitchen faucet or bathroom sink, and operates the recirculation system
- Wireless Motion Sensor - mounted near the point of use and operates the recirculation system with the detection of motion and designed to detect full-body movement up to 30 feet
- Wireless Temperature Sensor - the sensor turns off the recirculation and is available for purchase if required by local building codes

Additional push buttons and motion sensors can be purchased separately to customize recirculation systems for individual homes.
