

Rinnai Hydronic Air Handler System

How It Works

NOTE: FOR ILLUSTRATION ONLY.

Rinnai Hydronic Air Handlers are compatible with multiple AHRI certified cooling solutions that include outdoor condenser units and cooling coil systems.

Hydronic Heating Coil
High-efficiency, multi-row coil

Left or Right Side HVAC Duct Return
Allows flexibility during installation

Bottom HVAC Return Duct
Allows for horizontal or plenum installations.

3-Speed PSC Blower Motor Housing

Rinnai Tankless Water Heater or Boiler (purchased separately)

Water Inlet
Water from water heater into air handler

Recirculation Pump
(for models with integrated pump). Circulates hot water between the air handler and tankless water heater

Water Outlet
Water returning from air handler to water heater

Control Board
(not visible)

Corrosion Resistant Cabinet

Air Handler Rack Assembly (Accessory)

5/8 Foil-Faced Insulation
