

Rinnai®

Control-R™

Connect for **smarter** hot water.

INSTALLER BENEFITS

The Rinnai Control-R™ Wireless Module and App for Rinnai Tankless Water Heaters

THE SMARTER SOLUTION: FOR YOU AND YOUR CUSTOMERS

Rinnai creates innovative solutions that enhance the way people live. And with the introduction of the Rinnai Control-R™ Wireless Module and mobile app for Rinnai Tankless Water Heaters, we're taking control and flexibility to a new level.

With Wi-Fi connectivity, new and existing Rinnai Residential and Commercial Tankless Water Heaters (2006 and newer) can be remotely monitored and controlled via smart devices. Rinnai has the capability to provide a new option for management, control and maintenance of Rinnai Tankless Water Heaters.

Key Benefits:

Remote Diagnostics and Monitoring Alerts: Provide technicians detailed system information via automatic alerts and remote diagnostic tools before ever leaving your place of business.

- Receive Monitoring Alerts for Error Codes from Anywhere
- Real-Time Access to Tankless Usage
 - Inlet / Outlet Temperature
 - Hours of Operation
 - Water Flow
 - and much more

Enhance Customer Service Experience: Arrive at the site prepared with repair parts and troubleshooting knowledge leading to shorter maintenance and repair times.

Create Opportunities: Build your business revenue streams with service and maintenance contracts.

Online Product Registration: Quickly register the newly installed product before leaving the site.

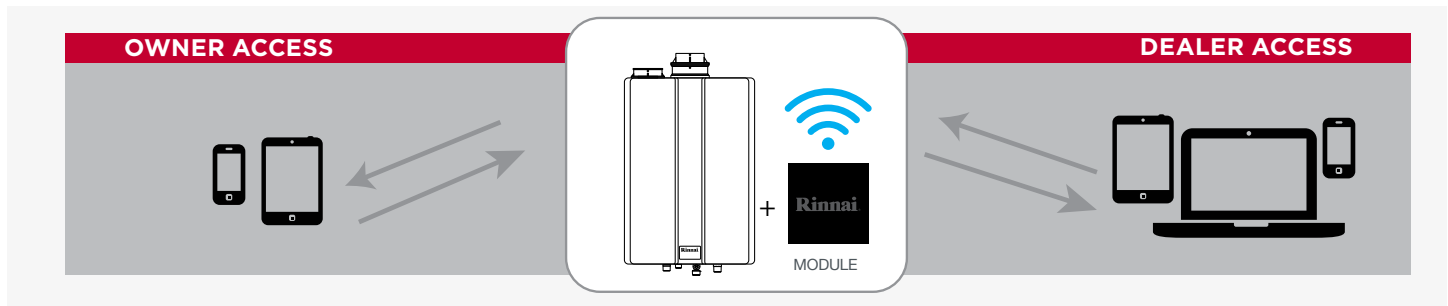

- Register Product Via QR code or Serial Number

Accessibility and Convenience: Get instant access to technical bulletins, warranty claims, product registration, manuals, step-by-step repair guides and more!

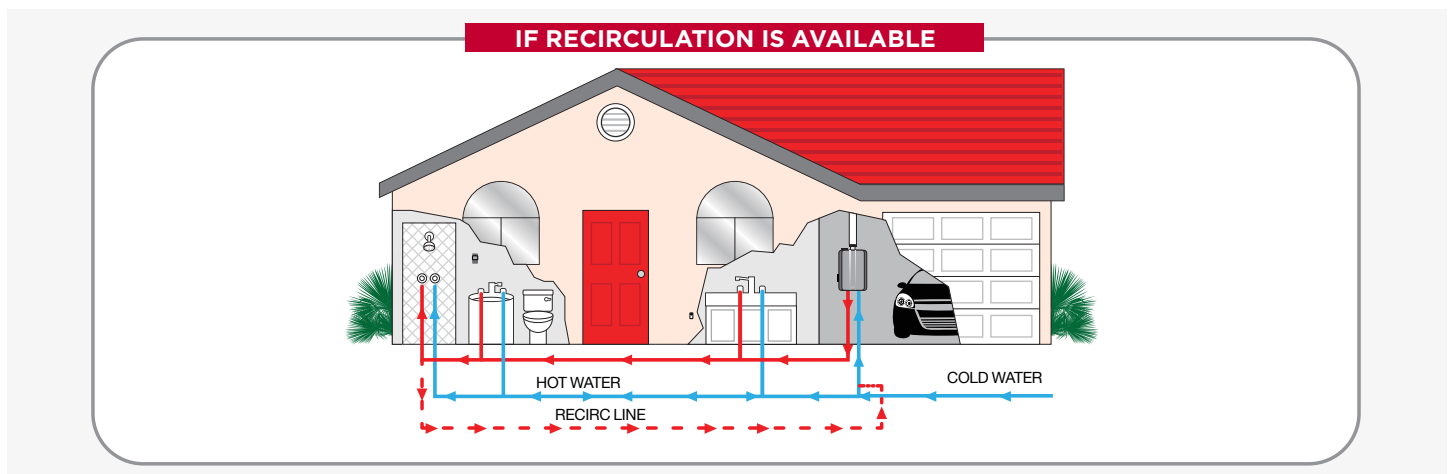

Rinnai®

The Control-R™ Module attaches easily to the Rinnai Tankless Water Heater by a two-wire interface quickly connecting through the local Wi-Fi network for monitoring. Once connected and the free Rinnai mobile app is downloaded, the Rinnai Tankless Water Heater can be associated to you, by the owner, for monitoring and servicing.

FOR MODELS WITH RECIRCULATION CAPABILITY

Rinnai has designed the Rinnai Control-R™ Module to pair directly with the push button and motion sensor demand recirculation accessories to provide faster hot water.

Key Benefits

- On demand hot water – only when you want it - where you want it... at the push of a button
- Title 24 Compliant - meets California Energy Commission's Title 24 requirements
- Wireless Control – no need to run wires to each fixture and faucet

Recirculation Components

- **Control-R™ Module** - attaches easily to the Rinnai Tankless Water Heater by a two-wire interface
- **Wireless Push Button** - mounted near the point of use, like a kitchen faucet or bathroom sink, and operates the recirculation system
- **Wireless Motion Sensor** - mounted near the point of use and operates the recirculation system with the detection of motion and designed to detect full-body movement up to 30 feet
- **Wireless Temperature Sensor** - the sensor turns off the recirculation and is available for purchase if required by local building codes
- Additional push buttons and motion sensors can be purchased separately to customize recirculation systems for individual homes.
