

Rinnai

Control-R™

Connect for smarter hot water.

HOMEOWNER BENEFITS

The Rinnai Control-R™ Wireless Module and App for Rinnai Tankless Water Heaters

SMART JUST GOT EVEN SMARTER

Rinnai creates innovative solutions that enhance the way people live. And with the introduction of the Rinnai Control-R™ Wireless Module and mobile app for Rinnai Tankless Water Heaters, we're taking control and flexibility to a new level.

With Wi-Fi connectivity, new and existing Rinnai Residential and Commercial Tankless Water Heaters (2006 and newer) can be remotely monitored and controlled via smart devices. The Rinnai Control-R™ has the capability to provide a new option for management, control and maintenance of Rinnai Tankless Water Heaters.

Key Benefits:

Control and Convenience: Control your Rinnai Tankless Water Heater from a smart phone or tablet.

- Adjust temperature
- Register product via QR code or serial number
- Activate recirculation (if you have a recirculation system)

Remote Diagnostics and Monitoring Alerts: Remote diagnostic tools provide detailed system information.

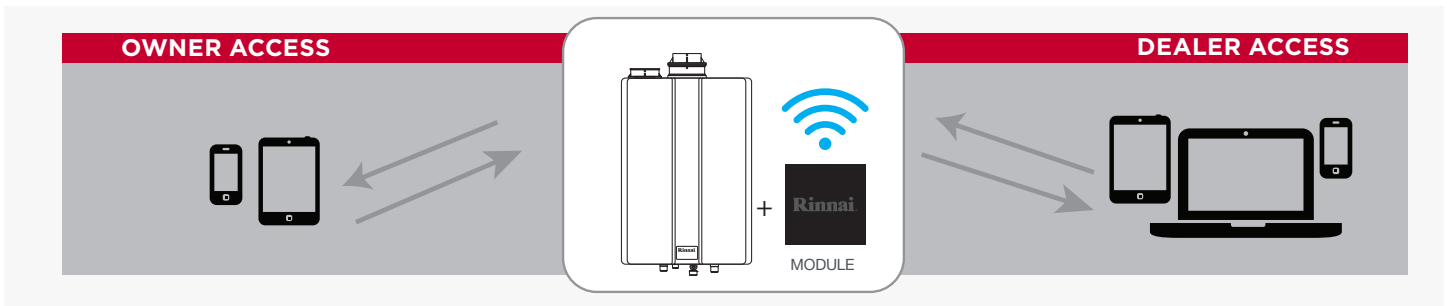

- Select a monitoring dealer
- Receive automatic maintenance alerts
- Enable monitoring dealer to manage system performance and provide faster service

Faster Hot Water: With the addition of wireless demand recirculation accessories, hot water can be obtained at the push of a button.

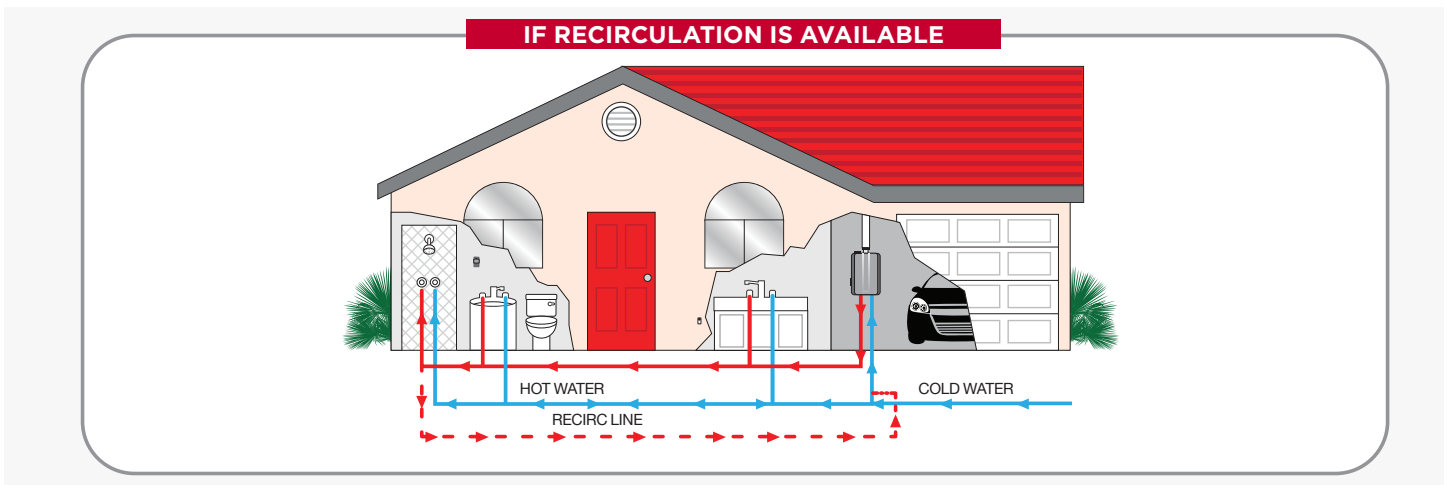

Rinnai®

The Control-R™ Module attaches easily to the Rinnai Tankless Water Heater by a two-wire interface quickly connecting through your Wi-Fi network for monitoring. Once connected and the free Rinnai mobile app is downloaded, the Rinnai Tankless Water Heater can be controlled using your smart phone or tablet.

FOR MODELS WITH RECIRCULATION CAPABILITY

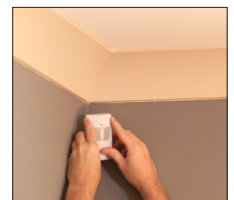

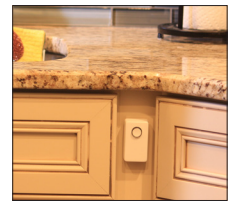

If your system has recirculation capability, you can activate recirculation through the use of the Control-R™ Module, motion sensor or push button. Ask your installer for details.

Recirculation Components

- **Control-R™ Module** - attaches easily to the Rinnai Tankless Water Heater by a two-wire interface
- **Wireless Push Button** - mounted near the point of use, like a kitchen faucet or bathroom sink, and operates the recirculation system
- **Wireless Motion Sensor** - mounted near the point of use and operates the recirculation system with the detection of motion and designed to detect full-body movement up to 30 feet
- **Wireless Temperature Sensor** - the sensor turns off the recirculation and is available for purchase if required by local building codes

Additional push buttons and motion sensors can be purchased separately to customize a recirculation system to your home.
